Global Transformation of Professional Practice-Implications for Architectural Education

7th to 11st December, 2026

2:30 pm to 5:45 pm

The online training programme aims to explore the changing landscape of architectural practice at the global level and examine its implications for architectural education. Through expert-led sessions and professional case studies, it will introduce participants to emerging professional roles, AI and digital technologies, sustainable design, new areas of specialisation, and evolving project delivery practices. The programme seeks to bridge the gap between academia and industry by equipping architecture faculty with contemporary knowledge and insights to make teaching and learning more relevant to current professional realities.

Key Highlights

1. Global Trends in Architectural Practice & Emerging Professional Roles

2. AI, Digital Technologies & Design Innovation

3. Sustainability, Heritage Conservation & Emerging Specialisations

4. Bridging Architectural Education and Professional Practice through Industry-Academia Collaboration

Key Takeaways

1. Understanding emerging professional practice models, roles, and business opportunities in architecture.
2. Evaluating the impact of digitalisation, AI, BIM, sustainability, and building performance on architectural practice.
3. Identifying future professional competencies, ethical responsibilities, and industry expectations.
4. Integrating emerging professional requirements into architectural curricula, teaching methods, and design studios.
